PROFESSIONAL SUMMARY

Backend Software Engineer with 2.5+ years of experience designing and building scalable microservices using Java, Spring Boot, Kafka, RabbitMQ and Elasticsearch. Experienced in REST/GraphQL API development, distributed systems, event-driven architectures and production reliability for systems serving 2M+ customers. Own day-to-day OFT/MFT operations, including production issue resolution, RCA and deployment validation. Experienced in MCP server development and leveraging AI-assisted tools to improve development and debugging efficiency.

EXPERIENCE

Airtel Xtelify
Oct 2023 – Present

Software Engineer - Backend — *Gurugram, HR*

- Designed and maintained backend microservices (**Feasibility, Telemedia, SFDC, Number Management, OFT-Analytics**) serving **2M+ customers** using **Java, Spring Boot** and distributed systems.
- Developed **TMF-compliant Service Qualification and Feasibility APIs** for telecom provisioning workflows.
- Owned reliability and production operations of **OFT/MFT systems**, driving incident resolution, RCA and deployment validation.
- Developed and integrated an **MCP server** for the **OFT/Feasibility** system to enable AI-assisted interaction with backend capabilities and workflows.
- Designed fault-tolerant and idempotent workflows processing **100K+ records/execution**, improving reliability across distributed systems.
- Built **OFT-Analytics Service** using RabbitMQ to reconcile and reprocess **10K+ failed feasibility requests/month**.
- Implemented reconciliation and recovery workflows, improving data accuracy, reliability and operational visibility.
- Implemented **Pincode Geo-Boundary Mapping** using Elasticsearch, achieving **95% mapping accuracy**.
- Enhanced observability through Kafka pipelines and ELK monitoring, reducing debugging and issue resolution time.
- Re-architected Feasibility Service into a modular, scalable design, improving maintainability and extensibility.
- Automated internal workflows using Python and Elasticsearch, saving **5+ engineering hours/week**.

Udaan
Jan 2022 – Jul 2022

Data Analyst Intern — *Bangalore, KA*

- Built **KPI dashboards/reports** for **5+ teams** using **SQL, Excel, Power BI**.
- Automated **10+ workflows** with **Python, Power BI, Google Sheets**, reducing manual work by **60%**.
- Developed **Pincode-distance mapping** to optimize last-mile delivery, saving **Rs.2L+ in logistics**.

TECHNICAL SKILLS

- **Languages:** Java, C++, Python, SQL
- **Backend:** Spring Boot, Microservices, REST APIs, GraphQL, JUnit
- **Messaging:** Kafka, RabbitMQ, Solace
- **Databases:** MySQL, PostgreSQL, MongoDB, Elasticsearch
- **Distributed Systems:** Event-Driven Architecture, Fault Tolerance, Idempotency, Scalability, High Availability
- **Platform:** ELK Stack, Kibana, OpenShift (OCP), Consul, API Gateway (Gloo)
- **Dev Tools:** Git, Jenkins, Maven, IntelliJ, VS Code
- **AI :** MCP Server, Copilot, Cursor AI, Gemini

PROJECTS

NoteUp WebApp | React.js, Node.js, MongoDB **2023**

- Developed a secure note-management platform with JWT-based authentication.
- Designed RESTful APIs and optimized MongoDB schemas for scalable data storage.
- Implemented rich-text editing, theme customization, and responsive UI.

ACHIEVEMENTS

- Recipient of **ACE Award(2x), Rookie Award and Airtel Superhero Award** at Airtel
- Solved **1000+ DSA problems**; **3 LeetCode**; **4 CodeChef**
- Ranked **44/4000** in NIT KKR GFG Contest; **1760/25K+** in CodeKaze
- Ranked **3rd in Department**; achieved **1800+ rating** on GeeksforGeeks

EDUCATION

NIT Kurukshetra **2019 – 2023**

B.Tech in Computer Engineering — ***CGPA: 8.8*** *Kurukshetra, Haryana*
